

# Harnessing the Data Revolution for Sustainable Development

|                   |   |
|-------------------|---|
| Project Title     | Harnessing the Data Revolution for Sustainable Development  |
| Project Summary   | Conduct research and identify data sets essential to monitoring and achieving the Sustainable Development Goals (SDGs), agreed in the UN Summit in September 2015, as part of support for the Global Partnership for Sustainable Development Data |
| Country           | United States   |
| Agency            | Department of State   |
| DoS Office        | S/GAC   |
| Post              | N/A   |
| Section           | N/A   |
| Number of Interns | 2   |

## Project Description

The Global Aids Coordinator Office (S/GAC) is seeking a virtual intern to be part of the team committed to accelerating momentum for harnessing the data revolution for sustainable development. Improving the collection and use of data for monitoring progress and for real-time program optimization is critical to sustainable development.

The eIntern will assist with brainstorming ideas, identifying areas to explore, compiling, analyzing, developing data visualizations, and ensuring the widespread use of data to advance implementation and monitoring of the Sustainable Development Goals.

The Sustainable Development Goals reflect global consensus that data is critical for their success – by improving the quality of interventions and services as well as ensuring progress can be tracked.

The eIntern project is designed for students who care about sustainable development, global health, and sustainable control of HIV/AIDS, and the power of good data to make a difference.

# Desired Skills Interests

## Skill

|   |
|---|
| App development                           |
| Data analysis                             |
| Database                                  |
| Design thinking                           |
| Digital media                             |
| Editing                                   |
| Geographic Information Systems (GIS)      |
| GitHub                                    |
| Graphic design                            |
| Imagining new solutions                   |
| Independent                               |
| Knowledge management                      |
| MS Office                                 |
| PowerPoint                                |
| Problem solving                           |
| Research                                  |
| Selling ideas                             |
| Statistics                                |
| Storytelling                              |
| Team player                               |
| User Experience (UX)                      |
| nice person                               |
| Communication Skills                      |
| Persuasion                                |
| Microsoft Excel                           |
| Data vizualization                        |
| Graphic Design                            |
| Infographics                              |
| International Development                 |
| data visualization                        |
| Self Motivated                            |
| Detail Oriented                           |
| Cartography                               |
| Evidence-based decision making            |
| Interest in development and social impact |
